

---

LYNDEN—Last evening, says the *Sonoma County Journal*, just as our paper was being put to press, a most disgraceful scene occurred on Main street—a taring and feathering operation. The hombre upon whom the chastisement was inflicted, is known in these parts as Dr. Johnson, and is a dentist by profession.—The charge preferred, is that of attempting to commit violence upon the person of a widowed lady from San Francisco, at present on a visit to this place. Of Johnson's guilt, little or no doubt can be entertained. In addition to this, he is reported to have made similar attempts at other places in this county, within a few months past.
